

Charging the Future

SKD-100 ORDERING INFORMATION
SKYDOCK FJ USB A SINGLE PORT SKD-100:
 SKD-100 Aviation's Lightest, Smallest 600V Spike
 USB A PED, EFB Charging Ports
 Part Name: SkyDock FJ Singles SKD-100
 Design Data: 909-2010-000.
 Part#: 909-2010-001-02FJ SkyDock Single
 Horizontal USB Without LED
 Letter of Assist: SUPPORTING DATA PARTS
 MANUFACTURING APPROVAL,
 Certification may be used as part of the application
 for PMA.
 STC Approval and Design Data STC: SA13-50
 A/C Installation: Boeing 737-200, 200C, 300, 400
 and 500 Series
 INSTALLED: Dassault Falcon Jet Airframes,
 Falcon 900 LX, Falcon 10 X, Falcon 8 X, Falcon 7 X
 Falcon 2000 LXS, Falcon 10 X, Falcon 8 X, Falcon 5
 X, Falcon 6 X

Aerospace Devices Inc.

Aerospace Devices Inc. designs, develops & produces all our next generation product lines to the highest FAA DO160G testing standards and engineers all our products to the highest flight safety designs. The SkyDock Design supports the mounting and installation in multiple locations and tight or limited space. Standard Aircraft Power input, saves installation, costs and time. The SkyDock Product Line offers the industries best Warranty

SkyDock™ SKD 100 Specifications

Operating input voltage range: 12V - 30V 5 Amp in-Rush

Main power standby current: 0.1A at 28V

Max. efficiency: 90%

Max. output current: 5.0A at 4.75V to 5.25V

USB 2.0 data connection option

Max. input voltage: 32 VDC / In-Rush 5 Amp

Self reset power surge

Input/output overvoltage protection

Static protection to 600V

Reverse power / short circuit protection

Battery full charge auto power reduction

Encapsulated, *waterproof circuit board*

Power ON indicator light, Optional

Supports Apple Lightning™ USB requirement

MTBF: 300,000 hours

Dimensions: W1.94 in x D1.48 in x H0.64 in

Weight: 1.5 oz

Wire length: 12 in

Positive wire: White

Negative wire: White / Black

Design registered*

Patent pending*

Add the following, The SkyDock Product line is DO160G
 Certified for Fix Wing, Flight Deck & Rotorcraft Installation.
